TAKING CARE OF THE FUTURE

Enhanced Technology for Rehabilitation

Technological innovations have been crucial for improving rehabilitation care. And they still are, in a society where people get older, self-management has become key, and technological advances allow for the development of game-changing therapies and training devices.

Roessingh Research and Development is proud to have been a key player in driving these innovations for the past 25 years. We would like to celebrate this milestone with you during our **25th anniversary symposium**.

This symposium will allow you to learn about and experience our most recent technological advances and technology-supported health services, to meet like-minded professionals, and to discuss what the tech-savvy rehabilitation care of the future will look like. And of course, together we will raise our glasses to **25 years of Roessingh Research and Development**.

The symposium will be opened by the Commissioner of the King of the province of Overijssel: **Ank Bijleveld**. Next, four keynote speakers will disclose the future of rehabilitation care:

- **Dik Hermans**, Board member of VitaValley
- **Jane Burridge**, Professor of restorative neuroscience at the University of Southampton
- **Hermie Hermens**, Professor telemedicine, Roessingh Research and Development
- **Hans Rietman**, Professor in rehabilitation medicine and technology, Roessingh Research and Development

You can take your pick out of multiple parallel sessions, each focusing on a specific topic. Plus, there is ample opportunity to try things out yourself at the technology demo market.

The symposium will be wrapped up by Dutch speed skater, world champion and local celebrity **Erben Wennemars!**

The symposium will cover a wide array of topics:

- Gaming
- Facilitating home exercising
- Activity monitoring and coaching
- Robotics
- Technology evaluation and implementation
- Valorisation and business

The symposium will take place at the Rabotheater in Hengelo, the Netherlands. On September 22, 2016; from 9.30 am until 5 pm.

Costs for the symposium are €50 per person, including coffee, tea, lunch and drinks afterwards.

Accreditation for the VRA is being requested.

For the most recent information, the full program, and registration, please visit the symposium website:
